To the PUBLIC, New-York, Oct. 16.

IT is now upwards of six Years that I have published a weekly News Paper, under the Title of the *New-York Gazette or Weekly Post-Boy*, which I have the Pleasure to think has been generally acceptable, and publicly useful: But having now Occasion to alter the Title of my Paper, I hope for the same favourable Reception of the *NEW-YORK JOURNAL or GENERAL ADVERTISER*, that my Paper met with under the former Title; since it will be conducted with the same Spirit, and to the same Ends,—the Suppression of Evil, and the Promotion of public and private Happiness. The Reasons of altering my Title are these, 1st, for the Sake of Distinction, as I am inform'd Mr. PARKER intends to publish a Paper under the former Title; and 2d, because, as he formerly publish'd a Paper under that Title, I would not avail myself of any Advantages from a Name originally assumed by him. The Number, for the Sake of more easily settling with my Customers, will run regularly on from my last Week's Paper. Perhaps, when Opportunity permits, I shall procure a Cut for the Head of my Paper, till which Time, it will be published in its present Form.

To the PRINTER,

SIR,

THE extract in your paper, (No. 1249.) was taken from a pamphlet written in the reign of king William, and printed in London in the year 1697; and the there are several passages in it peculiarly applicable to these times, and not suitable to our present circumstances, yet as these passages serve to illustrate the author's argument, it is thought best to reprint the whole pamphlet: which, in portions of about the same length as that in No. 1249, which was the beginning, may employ your paper three or four weeks more, and will be very acceptable to many of your readers. If you please, you may at the end add the following.

(Continuation of the Piece begun in No. 1249.)

AND here I can't avoid taking notice of some gentlemen who a few years ago were the pretence of patriots of this country, who had nothing in their mouths but the sacred name of Liberty, who in the late reigns could hardly afford the King the prerogative that was due to him, and which was absolutely necessary to put in motion this machine of our Government, and to make the springs and wheels of it act naturally, and perform their functions: I say, these Gentlemen that could not with patience bear of the King's ordinary guards, can now discourse familiarly of twenty thousand men to be maintained in times of peace; and the odious excuse they give for this infamous apostacy is, that if they should not gratify the Court in this modest request, another party may be created who will grant this, or any thing else which is asked, and then they say matters will be much worse; as if arbitrary Government was a different thing in their hands, from what it is in others, or that the lineaments and features of tyranny would become graceful and lovely when they are its valet de chambre. But let them not deceive themselves, for if they think to make their court this way, they will quickly find themselves outflattered by the party they fear, who have been long the darlings of avarice, and whose principles as well as practices are the enemies to all the legal rights, and just claims of their native country; and to these wretched materials will be made use of only to bring together the materials of tyranny, and then must give place to more expert architects to finish the building.

And tho' we are secure from any attempt of this kind during the reign of a Prince who hath rescued us from a captivity equal to what *Moses* redeemed the people of *Israel* from: A Prince whose life is so necessary to the preservation of *Europe*, that both protestant and popish Princes have forgot their ancient maxims, and laid aside their innate animosities, and made it their common interest to choose him their patron and protector: A Prince in whom we know no vices but what have been esteemed virtues in others, viz. his undeserved clemency to his enemies, and his exposing too much that life upon which depends not only our safety, but the liberties of all *Europe*, and the Protestant Religion through the world: I say, was this most excellent Prince to be immortal (as his great and glorious actions) we ought in common prudence to abandon all thoughts of self-preservation, and wholly to rely on his care and conduct. But since no virtue nor pitch of glory will exempt him from paying the common debt to nature, but death hath a fythe which cuts off the most noble lives; we ought not to entrust any power with him, which we don't think proper to be continued to his successors: and doubtless our great benefactor will not regret this, or any thing else that can reasonably be demanded in order to complete that deliverance so far advanced by his invincible courage and conduct; for to let us, like *Moses*, within view of the promised land, with a *plus altra*, is the greatest of all human infelicities, and such I shall always take our care to be, whilst a standing army must be kept up to prey upon our entrails, and which must in the hands of an ill

 following, viz.

to his Excellency Sir HENRY MOORE, Baronet, Captain General and Governor in Chief, in and over the Colony of *New-York*, and the Territories depending thereon in *America*, Chancellor, and Vice-Admiral of the same.

*the Humble ADDRESS of the General Assembly
of the said Colony.*

May it please Your Excellency,
W E His Majesty's most dutiful and loyal Sub-
 jects, the General Assembly of the Colony of
 New-York, have taken your Excellency's
 Message of the 17th of November last, into our most
 serious Consideration; and beg Leave to assure your
 Excellency, that nothing would give us greater Plea-
 sure than to find it in our Power to comply with every
 requisition, tending in any Manner, to promote His
 Majesty's Service. It is therefore with great Concern
 at we find it impossible to comply with what is now
 demanded, consistent with our Obligations to our Con-
 stituents. We shall always be ready to give the am-
 plest Testimonies of our Loyalty to His Majesty, and
 Submission to His Government; and that we hum-
 bly conceive, we do not stand in need of any Re-
 ward to the Interests of His Majesty, or of this
 Colony, absolutely necessary to our Information.

We hope it will be manifest that we are chosen to
do the such a Provision for the Support of His Ma-
jesty's Government in this Colony (as well as for
other important Purposes) as is most suitable to the
Circumstances of the Colony we represent; and that
should begethly of that most sacred
duty, if we should begethly with Burdens they
are incapable of supporting.

the Provision to be made last Session, for quartering Battalions, and one Company of Artillery, towards soldiers with a Burthen much greater than any of the neighbouring Governments lie under this Service, and imagined, that far from being performed on that Account, it would be accepted

Leave, further to represent to your
that by the Act of Parliament, it ap
Intention of the Legislature, to prov
the quartering Soldiers: only on a March

According to the Construction put on it here, is required that all the Forces which shall at any time enter this Colony, shall be quartered during the whole Year, in a very unufual and expenfive manner: That by marching several Regiments into this Colony, this Expence would become ruinous and insupportable: And therefore, we cannot comply with our Duty to our Constituents, put it in the Power of any Person (whatsoever Confidence we may have in his Prudence and Integrity) to lay such a Burden on them.

We should be very sorry to differ with your
lency on this, or any other Political Subject.
therefore it is proper to offer these Matters
Consideration, in hopes that they will be sufficient
demonstrate that the Objections against making
Provision required, are of a Nature the most
and weighty imaginable: And therefore we
boldly intreat your Excellency, to set our Conduct
most favourable, that is, in its true Light, by
sentencing that our Non-compliance on this Occasion
proceeds entirely from a just Sense of what
Duty requires.

[The Lift of the Premiums, Votes of the Assembly, &c. this Week take up so much of our Paper, that we are obliged to leave out most of the Articles of News, as well as several Pieces, and Advertisements, which will be inserted as soon as possible.]

From R. Island we are informed, That Thomas Moffat, Augustus Johnson, and Martin Howard, Esqrs. had petitioned the Assembly for Compensation for the Losses they had sustained by the Riots, in August 1765—and that the Consideration of their Petitions was referred to the next Session of Assembly.—A melancholy Accident happen'd on the Night of the 6th Instant, at Cumberland in that Colony. Three Children of Mr. Morris Tucker, being put or sent to Bed in an upper Room where there was a quantity of Flax, by some Accident, with the Candle, they set Fire to it.—The Children cried out Fire.—He ran to their Assistance, called out to his Wife to bring a wet Blanket and a Pail of Water—while she was about it, he endeavoured to disperse the Flax, and unhappily threw some near the Stairs, which prevented his Wife from giving any Assistance, and him and the Children from any means of Escape, the House was consumed and they all perished in the Flames. Several sudden Deaths have lately happen'd in that Government, and in Boston.

The Assembly at Boston having almost unanimously (81 against 1) passed a Vote for the Dismissal of Richard Jackson, Esq; from the Agency of that Province: it was laid before the Governor, who the next Day, told them he had refer'd the Consideration of it to the next Session, and prorogued them to the 11th of January next.

On Friday last, a Carman, said to be in Liquor, fell from a Wharf, and was drown'd. A few Days before, one Margaret Green, was found dead in her Bed. The Jury returns, that she died of excessive drinking.

The Earl of Halifax Packet Boat, Capt. Boulderford, is to sail this Day with the Mail for Falmouth. With him goes Passenger, William Samuel Johnson, Esq; Doctor of Laws, Agent for the Colony of Connecticut.
